

# SCREEN-FRAME CLAMPING UNIT

with Micro-Registration Adjustment

Screen Frame Clamping Unit  
on vacuum table with Sidekick™  
screen lifting mechanism.  
See opposite page.

**This economical upgrade from standard screen frame clamps allows registration adjustments without unclamping the frame**

## ADVANTAGES

- Provides accurate registration quickly
- Easy-to-read visual reference marks
- Easy-to-use locking controls
- Minimal setup time
- Heavy-duty, machined steel construction
- Works with metal or wooden frames
- Available in four standard sizes

Making micro-registration adjustments is quick and easy with A.W.T.'s Screen Frame Clamping Unit. This simple, yet highly effective system for side-to-side and front-to-rear screen positioning enables small image movements with only a few turns of the registration knobs. Machined micro-registration grooves provide an easy-to-read visual reference.

The Screen Frame Clamping Unit is well suited for tight, close or hairline register — essential to any multicolor application.

Made with steel for extra strength and durability, the unit can easily be mounted on any standard vacuum table or base. It accommodates both metal or wooden frames from 5/8 (.625 cm) to 2" (5.08 cm) thick and is available in four standard sizes from 26 (66.04 cm) to 58" (147.32 cm).
